Health and Safety

It is important that drivers of work vehicles are fully protected from harmful vibrations. KAB seats can eliminate up to 70% of these.

Careful seat selection is important and through consultation with KAB Seating's network of Authorised distributors the appropriate choice can be made.

Installation

Care should be taken to ensure a correct installation is made and the seat suspension movements and adjustments are free from obstructions in the cab area.

Maintenance

KAB Seating provides a full range of service parts to ensure seats can be maintained properly, key wear items such as shock absorbers, seat cushions and air valves should be replaced on a regular basis in accordance with the type of usage, amount of usage and environmental factors.

Regular removal of dust and dirt from the seat and cabin will improve the longevity of the seat.

Product Maintenance

KAB Seating offers a full range of replacement parts.

Deluxe Forklift and Industrial Seating

The KAB Seating range of low profile air and mechanical suspension seats are suitable for:

- Forklift Trucks
- Road Sweepers
- Airport Tugs
- Ride-on Mowers
- Small Utility Vehicles
- Vans and Light Trucks
- Small Construction Machines

These suspension seats offer drivers improved comfort and protection from harmful vibrations in their working environment and they fit most popular work vehicle brands.

The following comfort and safety options are also available:

- Seat Belts
- Hipguards
- Armrests
- Back Extensions
- Seat Sensor Switches,
- Headrests
- Heater Elements (12v, 24v or 48v)
- Lumbar Support

For small forklift trucks and work vehicles with limited cab space, KAB seats with a 50mm suspension stroke and thinline seat cushion provide effective protection for drivers.

In larger vehicles, suspension seats with a longer, 100mm stroke and deeper cushions are also available.

A full range of replacement parts are available for KAB seats which is an important factor to ensure 'safe seating' for drivers.
